

Fall 2022

Candyland

Have you seen a healthy kitten as he experiences the world around him? Everything is so new and exciting! Have you watched a senior cat, content in her comfy bed, secure in her surroundings? Have you ever earned the trust of a tom cat who has been out on the streets or watched how incredibly patient a new mama cat is with her kittens when she feels safe?

These are the moments we strive for and work hard to provide for the homeless cats in our program. The sick kittens rescued from under a shrub, the cat abandoned when his owner died and the family threw him outside, the cat confused and scared after being surrendered due to a crisis or the mom cat with newborns desperately trying to provide for them when she is starving herself.

Thanks to your generosity, in 2022, we have provided shelter, medical care, food and love for more than 1,000 cats and kittens. We have taken in 722 cats and kittens and have found loving homes for 500 so far this year. All of these cats have been vaccinated, spayed/neutered, treated for fleas and worms, microchipped and received any necessary medical care and all of this was possible because of you.

West with some of the many syringes used for her daily treatments

Lemonade

While some cats just need basic care, some cats need more specialized help. CRAN never turns away a cat due to its medical needs. Thanks to our donors, we have been able to provide care to cats with specialized

and complex medical needs like Valor, who was found on the side of the road unable to walk due to tendon contractions in his front legs, because he had been declawed earlier in his life, Candyland who needed her eye removed due to cancer, Lemonade who had spina bifida and needed a specialized surgery to stop the fluid leaking from her spine, West who beat Feline Infectious Peritonitis (FIP) with a revolutionary treatment and Phoenix who needed a repair for a pericardial peritoneal diaphragmatic

hernia. We all celebrated when one of our favorites, 12-year-old, Samuel Bernard, who had kidney disease, FIV and had been living on the streets, found his forever home. We can only help these cats because of you.

In addition to the cats in our program, we have spayed/neutered and vaccinated 152 community cats through our Trap-Neuter-Return program to date in 2022. We have also treated 11 cats in our ringworm program this year (did you know some shelters euthanize for this fungus?)

Phoenix recovering from surgery

Samuel Bernard

We receive multiple requests for help daily and have received 752 requests to date this year. While we aren't always able to take in every cat, our surrender team provides valuable resources and assistance to all who contact
